

- 1.Primary key is main key in the table and it doesn't include nulls
- 2.Active and Inactive
- 3.In the modelling section
- 4.Database design pattern commonly used in data warehousing. It's characterized by a central "fact table" surrounded by "dimension tables", resembling a star when visualized.
- 5.Sales
- 6.
- 7.Because ProductId in Sales.csv is linked to ProductId in Table.csv
- 8.
- 9.The purpose is to trade some redundancy (duplication of data) in the data model for increased query speed, by avoiding computationally expensive join operations.
- 10.
